

January 24, 1983

Dear Alfred,

I was very pleased to get your letter of 12th January. I talked to Zeynep about the restoration the Temple in Side. She cannot possibly stay in Side for a long time because of her duties at the university. Anyway we need an engineer to work continuously following Zeynep's restoration project. And Zeynep can frequently supervise it. Since I will be able to stay there as long as I wish, I think the work will go alright.

We have a lot of formalities to be solved before we start the work.

1. We must have the official permission from the "Anıtlar Yüksek Kurulu".

2. We need a statics project which will be done by Müfit Yorulmaz, a professor at the Technical University, a former student and friend of my husband.

3. Again a former student of my husband and a good friend of me, Mr. Aykut Savager, who has a building office in Antalya promised me to help in our restoration work. He can collaborate with Prof. Müfit Yorulmaz.

I am planning to come to Antalya with you in April. We can then arrange everything in detail.

Between 22nd-27nd of May The Symposium of Excavation in Turkey 1982 will take place in Istanbul. Also an exhibition of Europe Council will be opened during those days in Istanbul where the Anatolian culture from the beginning up today will be exhibited. I think it will be interested you to stay in these days in Istanbul.

I am sending 3 slides. I will be very happy if you could have color 30 x 40 cm. copies of them. Then will be exposed in Atatürk Kültür Sarayı in Istanbul during The Symposium of the excavations in Turkey.

I am glad to hear about the new organization The Institute of Turkish Studies. I am sure your contribution and Mr. Heath Lowry's will be great to it.

I have no complaints about my health, thank God.

I am looking forward to meeting you in April.

Best wishes for you and Jean
Yours as ever.
