

August 11, 1862

Dear Feza:

I am just sending the rest of my lecture notes to Dr Kortell. I was quite busy in Trieste and it took me longer to finish them than I expected. It is my hope that he does not have too much trouble with them.

We had a most interesting and enjoyable time in Istanbul and this was due, in large measure, to you and Mrs Sürsey's hospitality and kindness. We only wish we were able to show similar consideration to our guests.

Trieste is beautiful but hot. The lectures were, however, very interesting and there was good swimming. I just arrived at Frankfurt, Mary

5081, 11 30

and "the girls" will come tomorrow from Rome. We plan to return to Princeton by the end of the month.

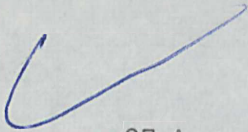

With the very best wishes to yourself, Mrs Surrey and the Inominis,

Sincerely
Eugene Wigzell

Dear Feza:

This is just to thank you once more for the miraculous hospitality in Turkey and to express the hope that you have rested up in the meantime. We surely enjoyed our stay and, professionally, the school was most interesting and useful. I am sure you have had similar expressions from many quarters.

I may have mentioned to you that I would like to write a short report on the conference for PHYSICS TODAY. I would like to include in this report some information which I had from you and which I think is interesting for our colleagues even though it is not strictly physics. It concerns the increase in the population of Turkey after the War, which I found truly amazing. Any other little point that you may want me to mention in the report would be much appreciated. I am also writing to Dr. Ozemri, asking him to give me a few data on the nuclear reactor.

With all good wishes to yourself and Mrs. Gursey,

Sincerely yours,

Eugene P. Wigner
