Now comes the question of pilgrimage to
Bethlehem. God bless Khari I'd love to
join him but really I feel I should
not eat up all my stock with you
by coming now. I have of 2 talks
to give — one on new resonances and
the second on Renormalization of Vector
Mesons — this latter is really magnificent
but I beg you to wait — Come here
in Feb. ; we have now Air Force money
& can send you RICH ; Bring your
good wife & the children,
stay here, let us settle our
dates & then I
shall come

running - May God bless you.
I am really happy tonight.

Yours ever in brotherhood
friendship & love
& faith Abdus Salam
