Dr. F. Gürsey
The Institute for Advanced Study
Princeton, N.J., USA

Dear Dr. Gürsey:

When I met Pauli last summer, he told me that you intended to come to Zürich in the summer term of 1959 before returning to your home country. Now, after the sudden death of Pauli, which is such a loss for all of us, I would like to ask you whether you would consider to come to Munich during this summer term. We all would be very glad to discuss with you the theory of the elementary particles.

We could probably provide the necessary funds for your stay in Munich from our institute. In case you can come to Munich, I would ask you to inform me whether you will come alone or with a family.

With the best regards, also to common friends in Princeton,

Yours,

W. Heisenberg
